新学期开学，武汉市新洲区邾城街章林小学一（1）班 42 名留守学生用上了新型防近视课桌椅。校长章建明介绍，这批桌椅是由武汉市青少年视力低下防治中心为学生配备的，用以督促学生形成正确的用眼习惯。

New semester, Xinzhou District of Wuhan, Zhu City Street, Zhang Lin Primary School, primary one (1) Class, 42 students use the new anti-myopia desks.

Principal Zhang Jian Ming says, these desks are from **Wuhan City Youth Poor Vision Prevention Center**, to help students to form correct habits with the eyes.

部分网友称很多小孩都会喜欢趴在桌子上写作业看书，老师会经常督促以免得近视。这种栏杆也许可有效防止近视。但也有很多网友不认同。

Some users said that many children will love reading books lying on the table doing their homework, the teacher will often urge to avoid too myopic. This railing maybe effective in preventing myopia. But there are a lot of friends do not agree.
